

C++ is a computer programming language that is a superset of C wherein additional features are made in the C language.

C++ is a middle-level **programming** language. C++ is a statically typed, compiled, general purpose, case -sensitive, free-form **programming** language that supports procedural, object-oriented, and generic **programming**.

## C++ Program

```
#include <iostream>

int main() {
    std::cout << "Hello World!";
    return 0;
}
```

### Output

Hello World!
